Workshop:

Navigating Tomorrow's Admissions Landscape: Skills for the Future

Session Description: In the age of technological and societal acceleration, the ways in which we work, live, and learn are changing rapidly, and with that, so are the skills, processes, and systems needed to recruit, enroll, and retain students and families. During this session, we will share future trends along with research-based skills and competencies needed for the future. We will discuss strategies for storytelling what matters for the future of your school; teaching, learning, and student admissions assessments in the Age of AI; as well as practical applications for emerging technologies within your admissions department.

Presenter:

Ann Marsh Rutledge | Executive Director, Mount Vernon Ventures

With a belief that the true mark of expertise is curiosity and a willingness to continue learning, Ann Marsh values her work leading research on emerging topics in education. She enjoys partnering with educators and leaders all over the world to design school strategy, innovate programs and systems, and transform teaching experiences. Over the course of her 15 years in education, she has taught and tutored students in grades PK through Grade 6, served as a Learning Specialist, Instructional Coach, and Curriculum Designer, as well as Head of Learning and Innovation for MV

Ventures. Ann Marsh is an innovative education leader with a passion for applying research to practice and guiding schools through change to meet their highest potential. She is a frequent speaker, facilitator, and consultant on topics ranging from the future of education, emerging innovation, and organizational strategy to instructional design including Inquiry-based Learning, Competency-based Assessment, and Design Thinking.
